

IPv6 Deployment in Japan - the way we accomplish -

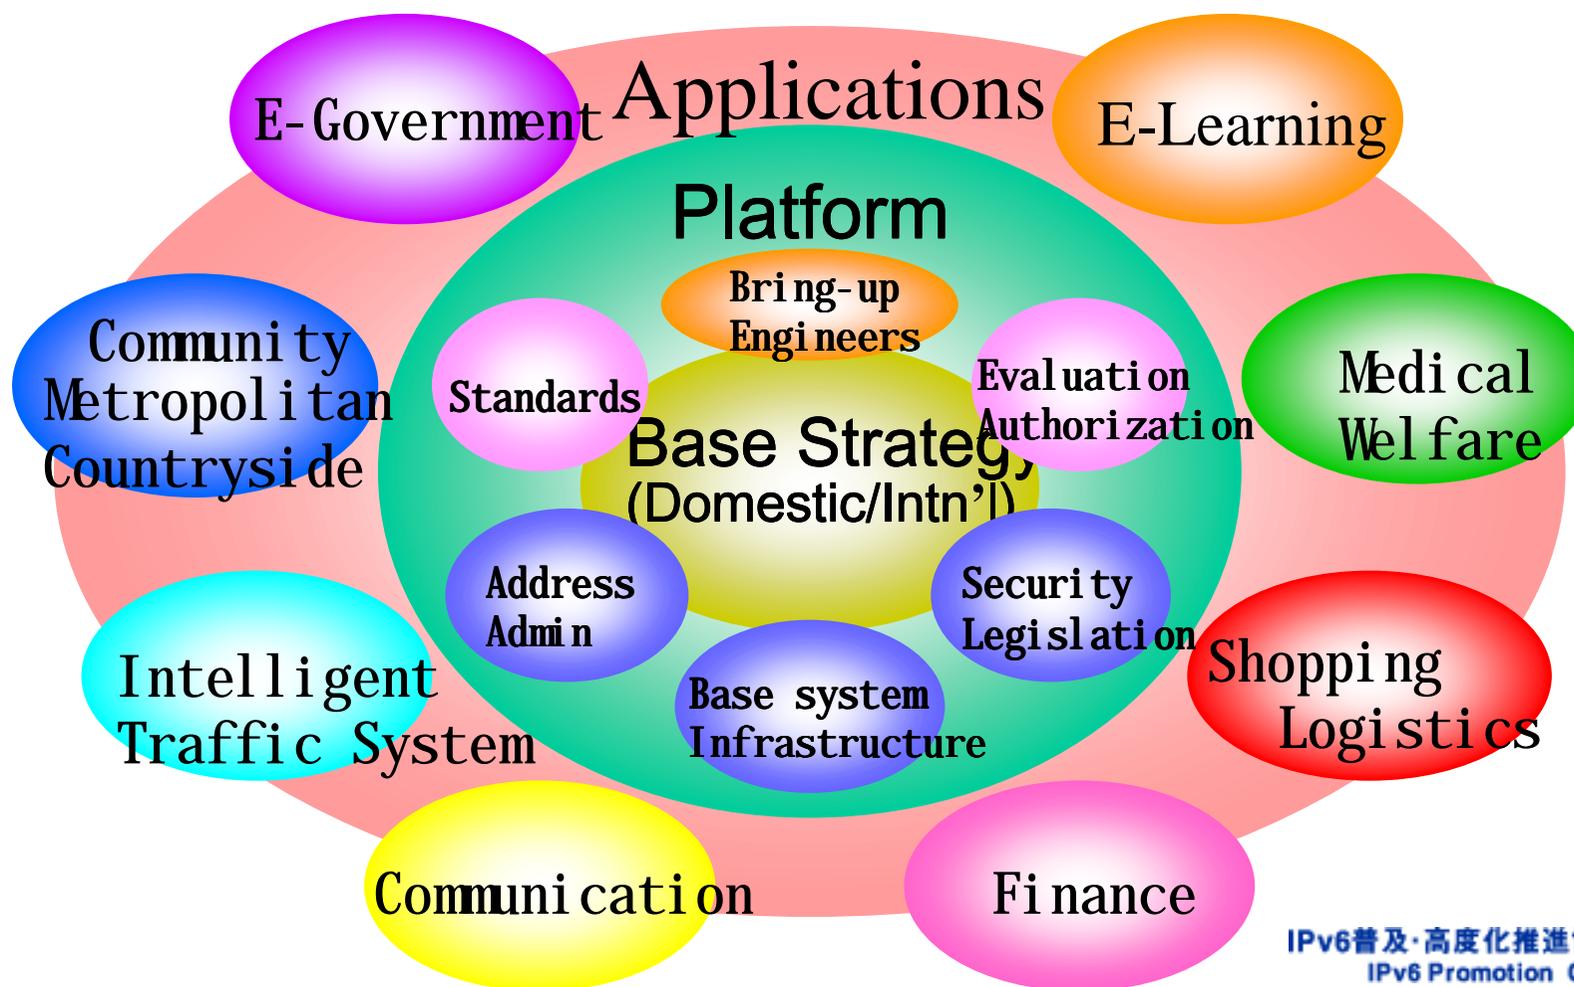

EC IPv6 Deployment TF –Phase II

September 12th , 2002

Kosuke Ito

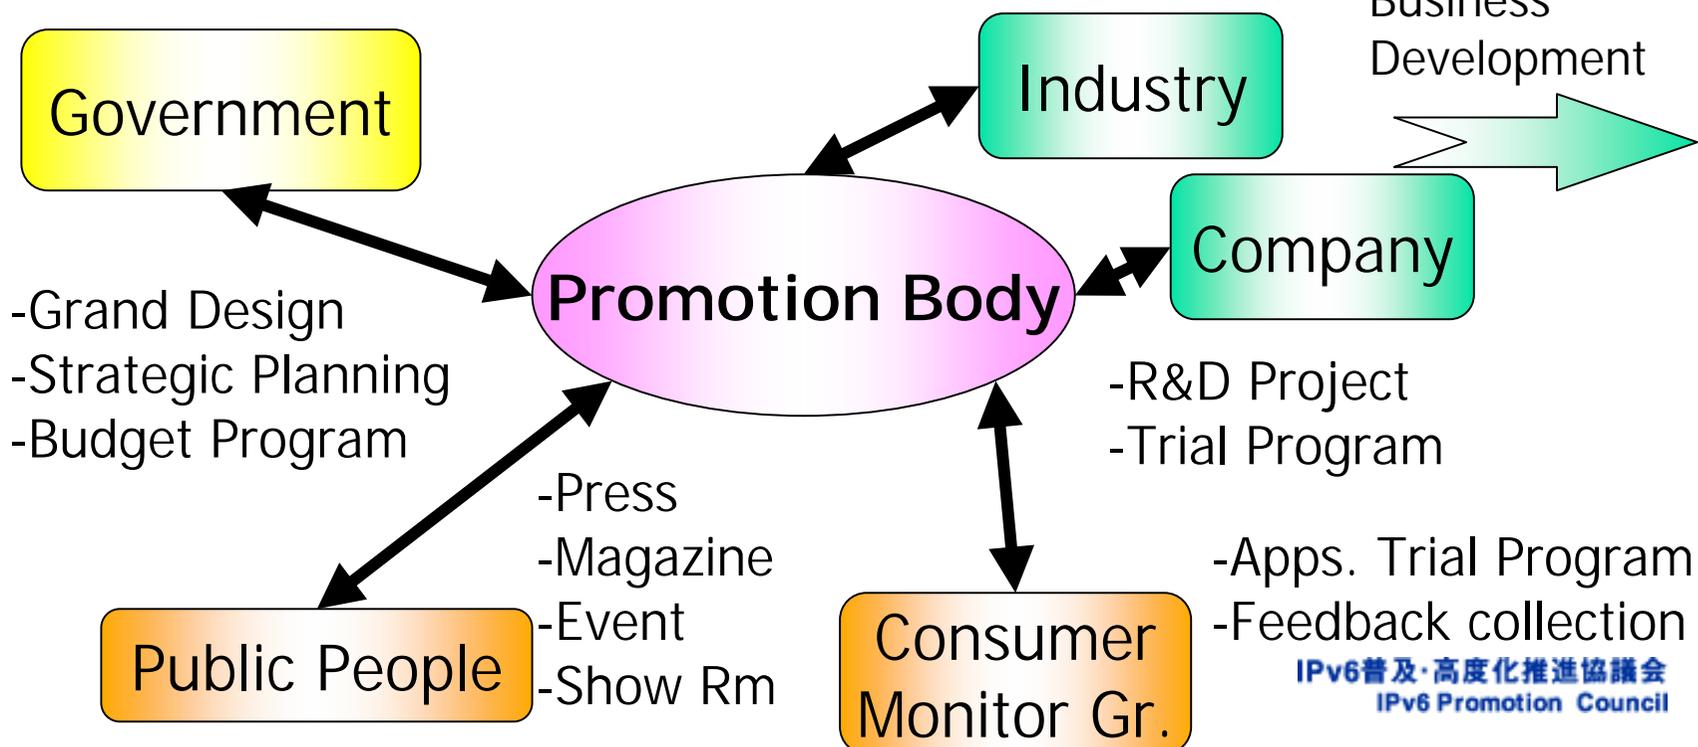

IPv6 Promotion Council of Japan

Deployment Scope shared by both Gov. & Industries

Deployment Promotion Body

- Performance of Promotion Body (Such as IPv6 TF) is the key for deployment
- Establishment of IPv6 PC for this sake

Deployment Status in Japan

All parts get ready in JP:

- Government Support IPv6 in “e-Japan”
- Major ISPs have started services
 - Even start-ups and rural small ISPs
- Backbone and IX providers have started
- Major router vendors are “v6-ready”
- Major terminal vendors started trials
 - Home appliances, sensors, Web-cameras, etc.
- Other service area started trials
 - Internet Car/Train, Medical, On-line Games, etc

ISPs

- IIJ
 - 1st IPv6 service (tunnel) in 1998
 - Offer Dual, IDC, Consultation at current
 - More than 100 customers
- NTT Communications
 - 1st commercial IPv6 service in 2001
 - Started Dual services for ADSL users
 - World-wide global transport service

ISPs (cont.)

- Others offer trial services
 - Powered Com
 - Japan Telecom
 - KDDI
 - Also started tunnel service for Mobile phone
 - Fujitsu, Panasonic, Sony, DTI, Mitsubishi for home users
 - Chita Medias (a local CATV provider)
 - MIS (Mobile IP/802.11b “Hot-spot” service)

ISPs (cont.)

- Others
 - JGN (Japan Gigabit Network)
 - Funded by Government
 - Nation-wide research network
 - Native IPv6 transport (not tunnel)
 - IPv6 over ATM
 - 622 Mbps capacity
 - 45 access points in nation
 - This site is also connected to Kita-Kyushu point

IXs

- NSPIXP6
 - Operated by WIDE Project
 - About 40 ISPs and organizations connected
 - 180 Mbps recorded in peak
- JPIX
 - 1st commercial IPv6 IX with APNIC/JPNIC special allocation for Ixs
- MEX (Media Exchange)
 - Started transit service

Router vendors

- All Japanese vendors are ready to go

- HITACHI
- Fujitsu
- NEC
- Furukawa Electric
- YAMAHA
- Etc...

HITACHI
Inspire the Next

FUJITSU

NEC Empowered by Innovation

 **YAMAHA**

YAMAHA
Home Router
NTTC/OCN Dual Stack
Service approved

Promotion Activities

- IPv6 Promotion bodies helps activities
 - IPv6 Deployment Committee
 - Est. 2001 under Internet Association of Japan
 - IPv6 Operation Study Group
 - Solve issues in IPv6 operation and study for standardization proposing to IETF
 - Publish IPv6 related articles in IA Japan Review
 - Play a role of liaison to IPv6 Forum
 - Plan and execute “Global IPv6 Summit in Japan”

Promotion Activities (cont.)

- IPv6 Promotion Council of Japan
 - Basic activities funded by Government
 - Help conducting many trials
 - Home Appliance
 - Internet Trains
 - Broadcasting (multi-angle views of Baseball games)
 - Tele-control/sensing
 - International Coordination
 - EU-JP cooperation: IPv6 TF, Eurov6
 - Korea-JP operation meeting
 - China-JP collaboration: 6TNet
 - Taiwan-JP collaboration
- Hosting IPv6 Showroom “Galleria v6”

Promotion Activities (cont.)

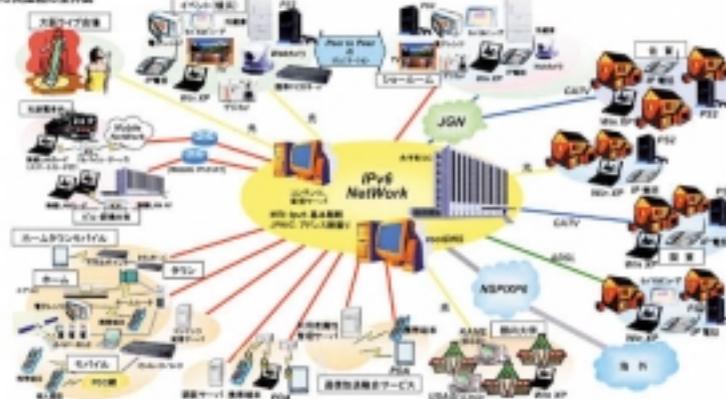

GALLERIA v6

インターネット新体験ゾーン
 次世代インターネットが
 もうすぐやってきます!!
 IPv6普及・高度化推進協議会では、
 次世代のインターネットを
 直接見て、さわって、体験していただくため、
 全国各ヶ所に

ショールームをオープンしました。

- 札幌/ビック ビーカン 札幌店 (3F)
- 東京/ダウンロードステーション@大手町
- 東京/ビック ビーカン 有明店 (5F)
- 大阪/ダウンロードステーション@OBP
- 大阪/ビック ビーカン なんば店 (5F)

※IPv6実証網の全体図

Other Activities

- Publication: *increase public awareness*
 - IPv6 Magazine (former “The IPv6 Journal”)
 - Issued quarterly as an extra number of “Internet Magazine”
 - IPv6 experts in Japan contribute writing
 - Pick up hot topics in technical standards, operation, services, products, overseas activities update, etc.
 - IPv6 PC contribute articles regularly

Other Activities

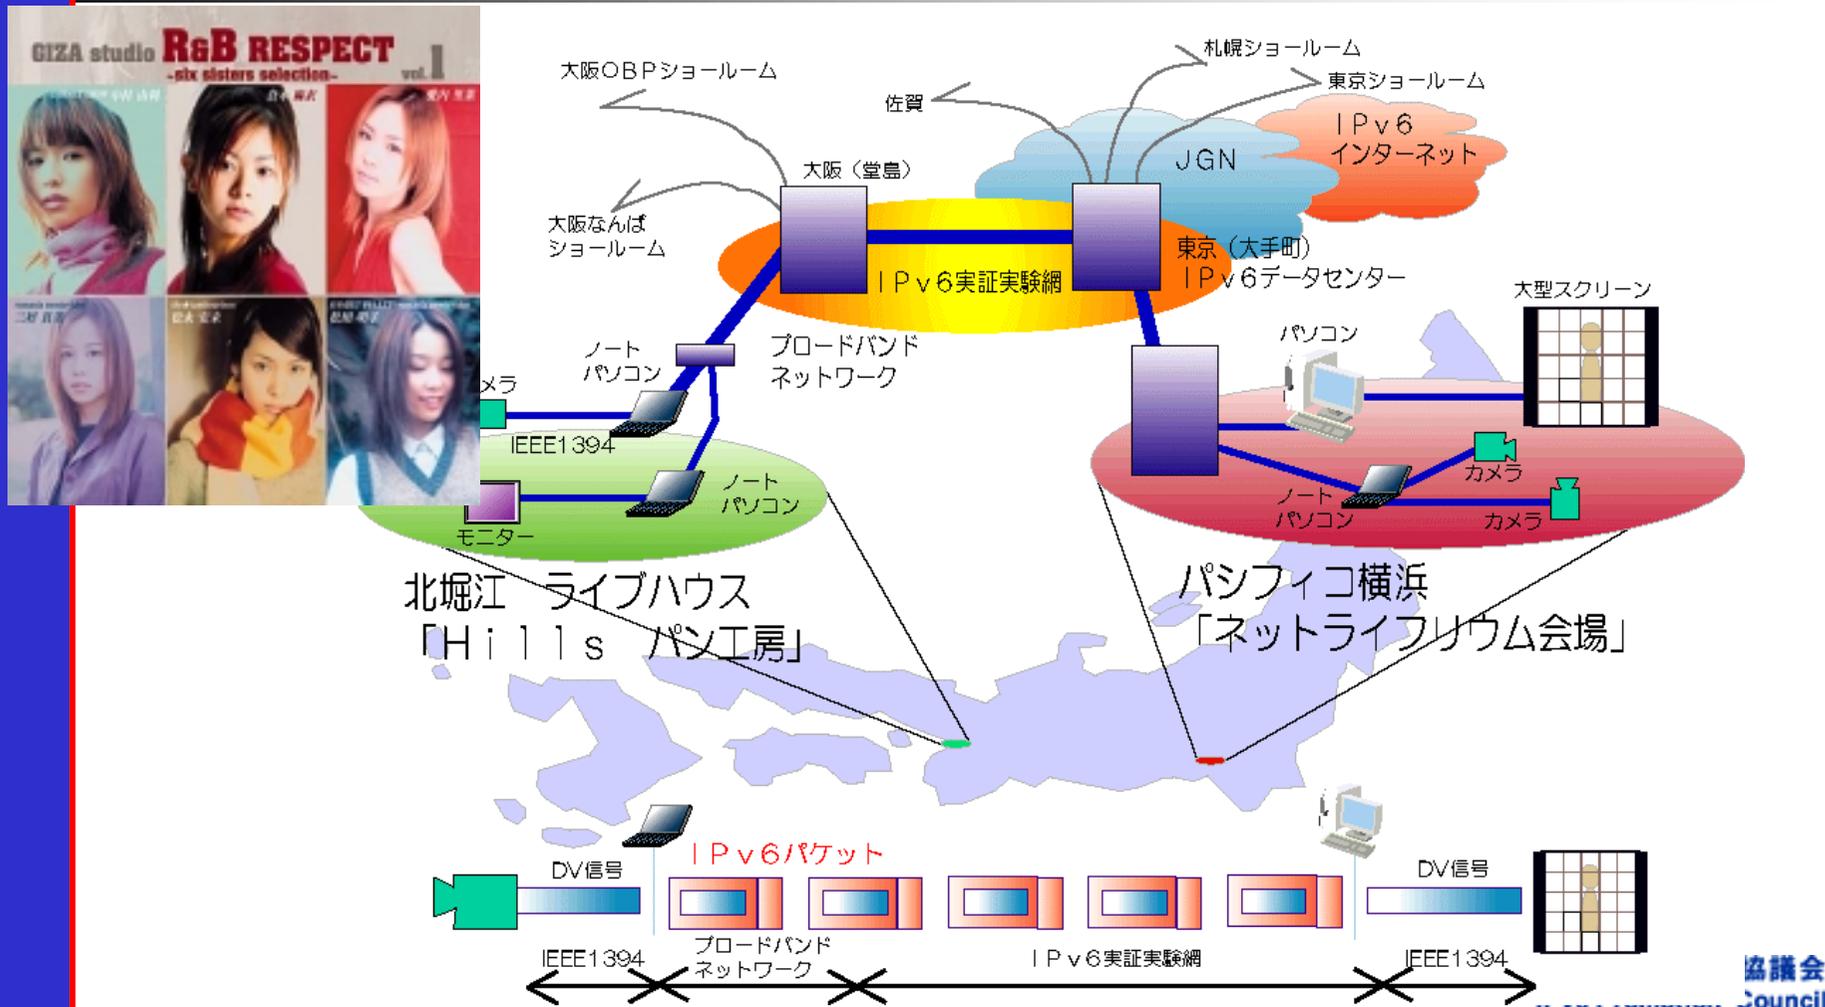

- Publication (cont.)
 - Web news “v6start” by Nikkei-BP
 - <http://v6start.net/>
 - Hot topics, educational corner, political discussion, etc
 - So-called “v6-Press Club”
 - Call all interesting press members by IPv6 PC
 - Contacting every event or news happen

Trails:

- Please take a look video provided from IPv6 PC

http://www.v6pc.jp/data_e.html

1st IPv6 Internet Live Concert in History @ NetLiferium (Internet/ISP event for consumers)

Ex: WLAN Access on Trains

Wireless LAN service inside moving trains.

ODAKYU(TOKYO)

KEIKYU(TOKYO)

NEX(TOKYO)

IPv6 Promotion Council

Test-bed participants:

- Carriers/ISP :
NTTc, Yusen, IP Revolution, Tokyo-Metallic, JCN, Biglobe, Nifty, etc.
- Data Center :
NTT Communications, and others
- Modem (cable, ADSL):
Panasonic, Hitachi, Yamaha and etc.
- Security (IPSec/IKE/PKI/IDS/DDoS) :
INTEC and others
- Operating System :
Microsoft (including WMP)
And...

Test-bed participants: (Cont.)

- Contents Delivery Service : **Accelier**
 - VoIP/IP Phone : **SoftFront**
 - Wireless : **NOKIA, SHARP, NTT-DoCoMo, J-Phone**
 - Sensor node : **Yokogawa , NTTc**
 - Game gear : **SONY**
 - Home Appliances: **Toshiba, Panasonic, Sanyo**
 - Digital Camera: **Sanyo**
 - Web Camera: **Canon, NEC, etc.**
- ...and others

Situation in Japan:

- IPv6 is becoming a basic technology
 - Adoption of IPv6 is not special anymore
 - IPv6 access services are getting ready
- Japan is moving to the 2nd stage
 - The focus is moving to new application for next generation of Internet market
 - Hardware vendors also challenge to introduce new network-oriented products
 - Some new applications emerge

Words from Japan:

- Contribute to global advancement
 - Global effort and advancement is necessary to lower the cost
- Share the deployment experience
 - Organic link of Promotion Bodies is important
- Many trials from many different aspects
 - Nobody knows which application will break
- Obtain more attention of various kinds of people

Announcement:

- Global IPv6 Summit in Japan 2002
 - Dec. 18-19, 2002 @ Yokohama
 - “Share Vision and Know-how for Business development”
 - Workshop Day (Dec. 18th)
 - IPv6 setup tutorial
 - IPv6 implementation session for Company Network
 - IPv6 conscious application development tutorial
 - IPv6 embedded system development session
 - Conference Day (Dec. 19th)
 - Panel discussions

Thank you and
Let's do together!
